

SAMIRA KABIR RIMA

FULL-STACK DEVELOPER

ABOUT ME

As a Software Developer with a strong academic foundation in Computer Science, I bridge the gap between robust industry practices and innovative research. Having graduated Magna Cum Laude with a 3.88 CGPA, I have already contributed to the field through published research in deep learning and antenna design. My current work at Siara Solution involves building complex full-stack applications using React, Node.js, and PostgreSQL. I am now seeking to pursue a Master's degree in Australia to deepen my technical expertise and contribute to the next wave of technological innovation.
